

Overcome supply chain obstacles to optimize the bottom line

Global Sourcing & Purchasing Post 9/11

New Logistics Compliance Requirements and Best Practices

Michael I. Assaf, *CTL MCILT CITE*
Cynthia A. Bonincontro
Stephen R. Johnsen

About the Authors

Michael I. Assaf is the Head of International Trade, Compliance and Import Operations at LANXESS Corporation*.

Cynthia A. Bonincontro serves as the Import Compliance Officer for the Import Department at Bayer HealthCare LLC.

Stephen R. Johnsen is Bayer Corporation's Manager of International Compliance, responsible for the compliance of nearly \$4 billion in annual international transactions.

The events of September 11, 2001 have forever changed the dynamics of importing or exporting products into the United States. This privilege, which can be revoked for non-compliance, has been made dramatically more complex and expensive by the numerous new rules, regulations, laws and requirements of various agencies. Procurers of foreign merchandise have had to revisit current U.S. Customs' rules and regulations, reevaluate their company's existing import procedures, and consider further stabilizing and strengthening their Customs compliance. **Global Sourcing & Purchasing Post 9/11** provides sound and innovative purchasing, logistics and supply chain management techniques for acquiring customers, increasing competitive advantage, reducing costs, and improving end-to-end supply chain performance while ensuring required compliance.

Key Features

- Provides comprehensive importer and foreign entity guidelines for achieving cost savings, improving delivery turnaround time, securing compliance, building product classifications and optimizing trade for reduced or eliminated duties
- Explains how to set up a purchasing cost-analysis program for quick evaluation, obtain cost savings via currency hedging and a forward currency contract, and provides activity-based costing information to help firms manage and benchmark logistics costs
- Discusses the various levels of automation that are currently available from document imaging to full automation of the compliance process, how Radio Frequency Identification (RFID) smart labels can improve your supply chain, and presents innovative ways of achieving Just-in-Time (JIT) inventory for imported merchandise
- Covers global e-sourcing systems, applications, processes and best supply chain practices as well as new electronic procurement standardizations to analyze requirements, identify gaps, and make recommendations for improving the interoperability of internet-based e-procurement systems
- **WAV** Offers free downloadable slides that provide a high level overview of the importance of an integrated logistics compliance system, a U.S. Customs 2005 Harmonized Tariff Schedule and a list of helpful websites providing regulatory product information and required government forms needed for U.S. clearance — available from the **Web Added Value™ Download Resource Center** at www.jrosspub.com

Global SCM best practices

Supply Chain Vector

Methods for Linking Execution of Global Business Models with Financial Performance

This book demonstrates the links between supply chain tactics and financial performance. It focuses on the relationships between lead time, landed costs, inventory levels, and the results found in the income statement, balance sheet, and cash flow statement as key elements for long-term success.

- Presents solutions based on up-to-date material and direct experience with global manufacturers
- Offers 19 different financial methods to measure supply chain performance

Catalog No. J231, ISBN: 1-932159-23-1
