

Project Management Made Simple

Dynamic Scheduling

With Microsoft® Office Project 2003

The Book By and For Professionals

By: Eric Uyttewaal, PMP, International Institute for Learning, Inc.

Maximize MS Office Project 2003 Software...

Microsoft Office Project 2003 is a powerful software tool, and like all tools, it requires knowledge and skill to be used to its maximum potential. This fully revised new edition of Eric Uyttewaal's best-selling book on Microsoft Project provides users with everything they will need to more easily and effectively manage projects to a successful conclusion. **Dynamic Scheduling with Microsoft® Office Project 2003: The Book By and For Professionals** is not only written by a certified PMP® and project management practitioner with over 17 years of experience using and teaching MS Project, but is also based on the cumulative experience of the author's clients, and other instructors, and includes insights from numerous other professionals who have used MS Office Project successfully. This unique guide, based on research from over 1,000 real-life schedules, gives a complete picture of how to use this software to achieve the best results. "A must read, reread, and use daily for all project managers" is what PMI's *Project Management Journal*® had to say about the previous edition. This updated version is even better.

About the Authors

Eric Uyttewaal is Vice President of Microsoft Project Certification at the International Institute for Learning, Inc., an internationally-recognized learning organization and leader in the field of project management. Eric is a best-selling author and a project management practitioner. Over the past 17 years, he has taught thousands of people on MS Project software. Eric was the first Canadian certified in MS Project by Microsoft and he is certified as a PMP by PMI®.
